¹⁾ The lower limit of the measuring range of the accredited method is also the limit of quantification set by the Laboratory.

²⁾ The measurement uncertainty is ± 50%, according to Sante/11312/2021 v2026.

³⁾ For compliance assessment, the decision-making principle according to SANTE/11312/2021 v2026 was adopted.

⁴⁾ The maximum residue levels of pesticides specified in Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005, as amended, were not exceeded in the test sample in the scope of analysed compounds.

⁵⁾ List of analysed pesticide residues with limit of quantifications is given in Annex List-F&V-XL-ECO.

⁶⁾ RL: 0,010 mg/kg

TEST REPORT NO. 823793/26/GDY

- 7) Ethylene oxide is a banned substance for use in food in the European Union and any presence of it in food is prohibited.
- 8) Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC.

Test: Ethylene oxide was performed in laboratory with an accreditation number D-PL-14400-01-00

Test report authorized by:

ID: 448, Analysis Expert, Authorization Section

ID: 704, Senior Analysis Specialist, Pesticide Residues Analysis Laboratory -Słomczyn

ID: 1629, Analysis Expert, Pesticide Residues Analysis Laboratory -Słomczyn

The test report bears the certified electronic seal of J.S. Hamilton Poland Sp. z o.o.

The results refer only to the samples received and tested. The laboratory assumes no responsibility for the method of sample collection, the conditions of their transport, or for the information provided by the Client, including data that may affect the validity of the test results. When a measurement uncertainty is given, it is an expanded uncertainty estimated for a coverage factor $k=2$ at 95% confidence level and is not including sampling uncertainty, unless otherwise stated. When the conformity is stated J.S. Hamilton Poland Sp. z o.o. applies the simple acceptance decision rule in accordance with ILAC-G8:09/2019, unless otherwise reported. If no criterion for a given test or tests in the analyzed matrix has been specified in the reference document indicated by the Client, confirmation of compliance is not possible. If the "result" column contains a record: "<" or ">", it means, that it is the test outcome directly related to the lower or upper limit of the measuring range of the method. If an expanded measurement uncertainty is given for such a test outcome, it relates only to the lower or upper limit of the measuring range of the method, respectively. In the case where the Laboratory base on the obtained test outcome, "statement of conformity" column presents an opinion and interpretation. This test report may not be copied in part without the prior written permission of J.S. Hamilton Poland Sp. z o.o. The responsibility of J.S. Hamilton Poland Sp. z o.o. is limited solely to the data issued in its original. J.S.
